

Public attitudes in Georgia

Results of a November 2016 survey carried out
for NDI by CRRC Georgia

This research is funded by the Swedish
International Development Cooperation Agency
(Sida)

Laura Thornton - NDI Georgia
Koba Turmanidze – CRRC-Georgia

Why We Conduct Polls?

- Foster the development of more responsive policies and governance;
- Help stakeholders diagnose and address issues of public concern;

- leaders from across the political spectrum have reported that the polls are important to their work and encourage continued polling;

- Inclusive process: the polling instrument was developed in consultation with parties, government, and civil society leaders;

Information about the poll

- Fieldwork dates: November 4 – December 4, 2016
- 3,141 completed interviews
- A nationally representative sample including oversampled areas of the Capital, Urban, Rural, minority settlements, Kutaisi, Batumi, Zugdidi and Akhaltsikhe cities
- Minority stratum consists of population of those settlements, where ethnic minorities (mostly Armenians and Azeri) make at least 40% of the total settlement population. Settlements within this stratum are dispersed through Kvemo Kartli, Samtskhe-Javakheti and Kakheti regions
- The average margin of error is +/- 1,8%

Methodology

Sample design

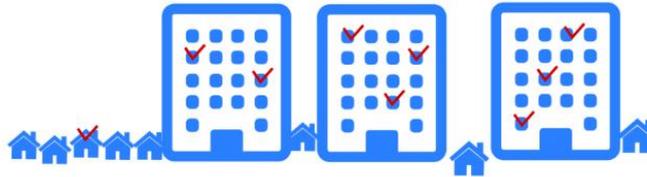

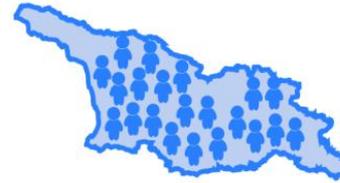

NDI and CRRC use a complex survey design:

- ✓ **Stratification** – dividing population in relatively homogenous sub-groups
 - ✓ **Clustering** – randomly selecting small geographic areas for each sub-group (stratum)
-
- Households are selected via random route sampling
 - Respondents are selected using a Kish table
 - Randomly selected households and individuals are not substituted
 - All interviews were conducted face-to-face, in Georgian, Armenian and Azeri.

How NDI Survey is Conducted

1

At the first stage, CRRC randomly selects voting precincts in Georgia. Interviewers are sent there with given starting point, directions for walking, step size, number of contacts.

2

Interviewer randomly selects households according to the given step size, e.g. every 3rd, 5th, 8th...

3

The respondent is selected randomly, with special method - so called Kish grid. Selected respondent cannot be replaced.

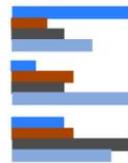

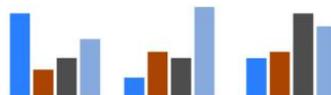

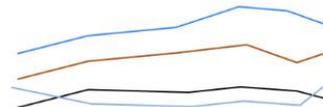

4

Interviewer conducts an interview with the selected household member. Interviewer uses tablet computer and a special software.

5

Interviewer submits the results via the internet to the special server.

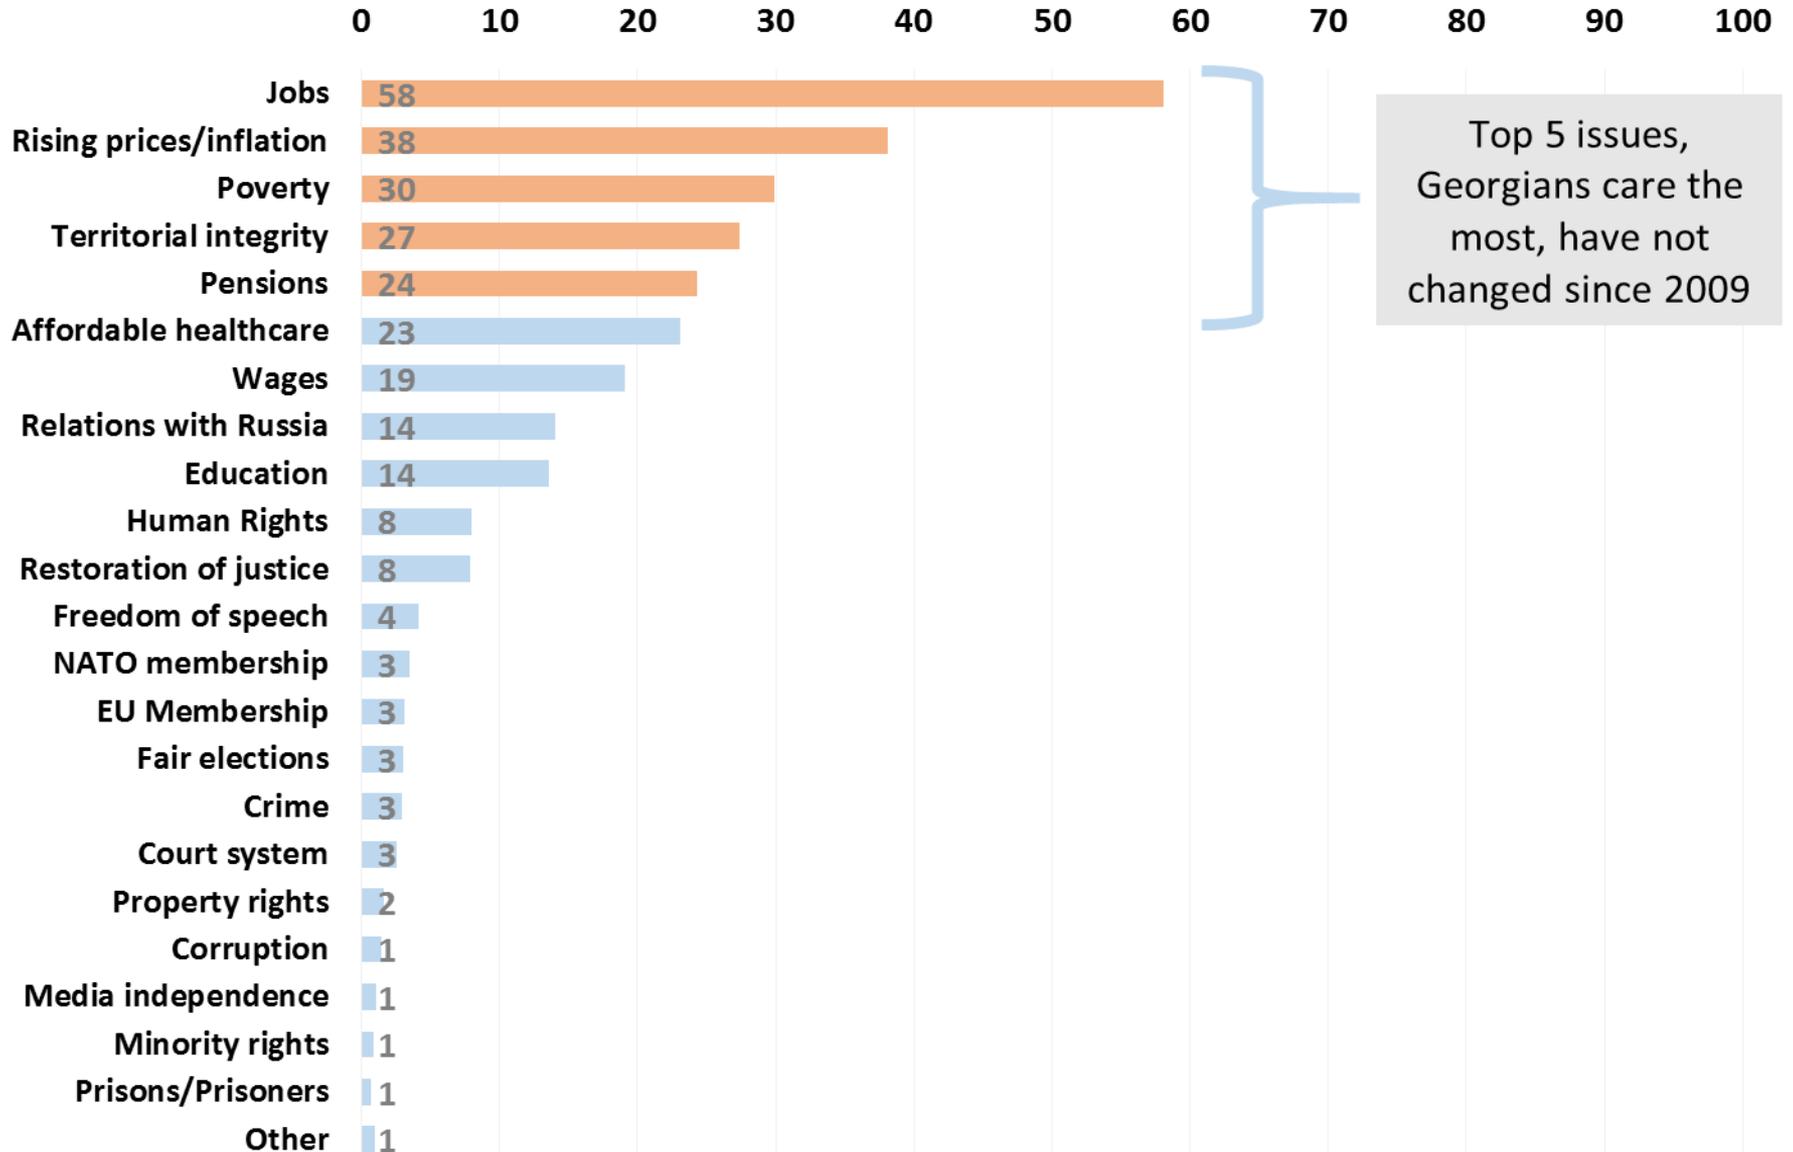

6

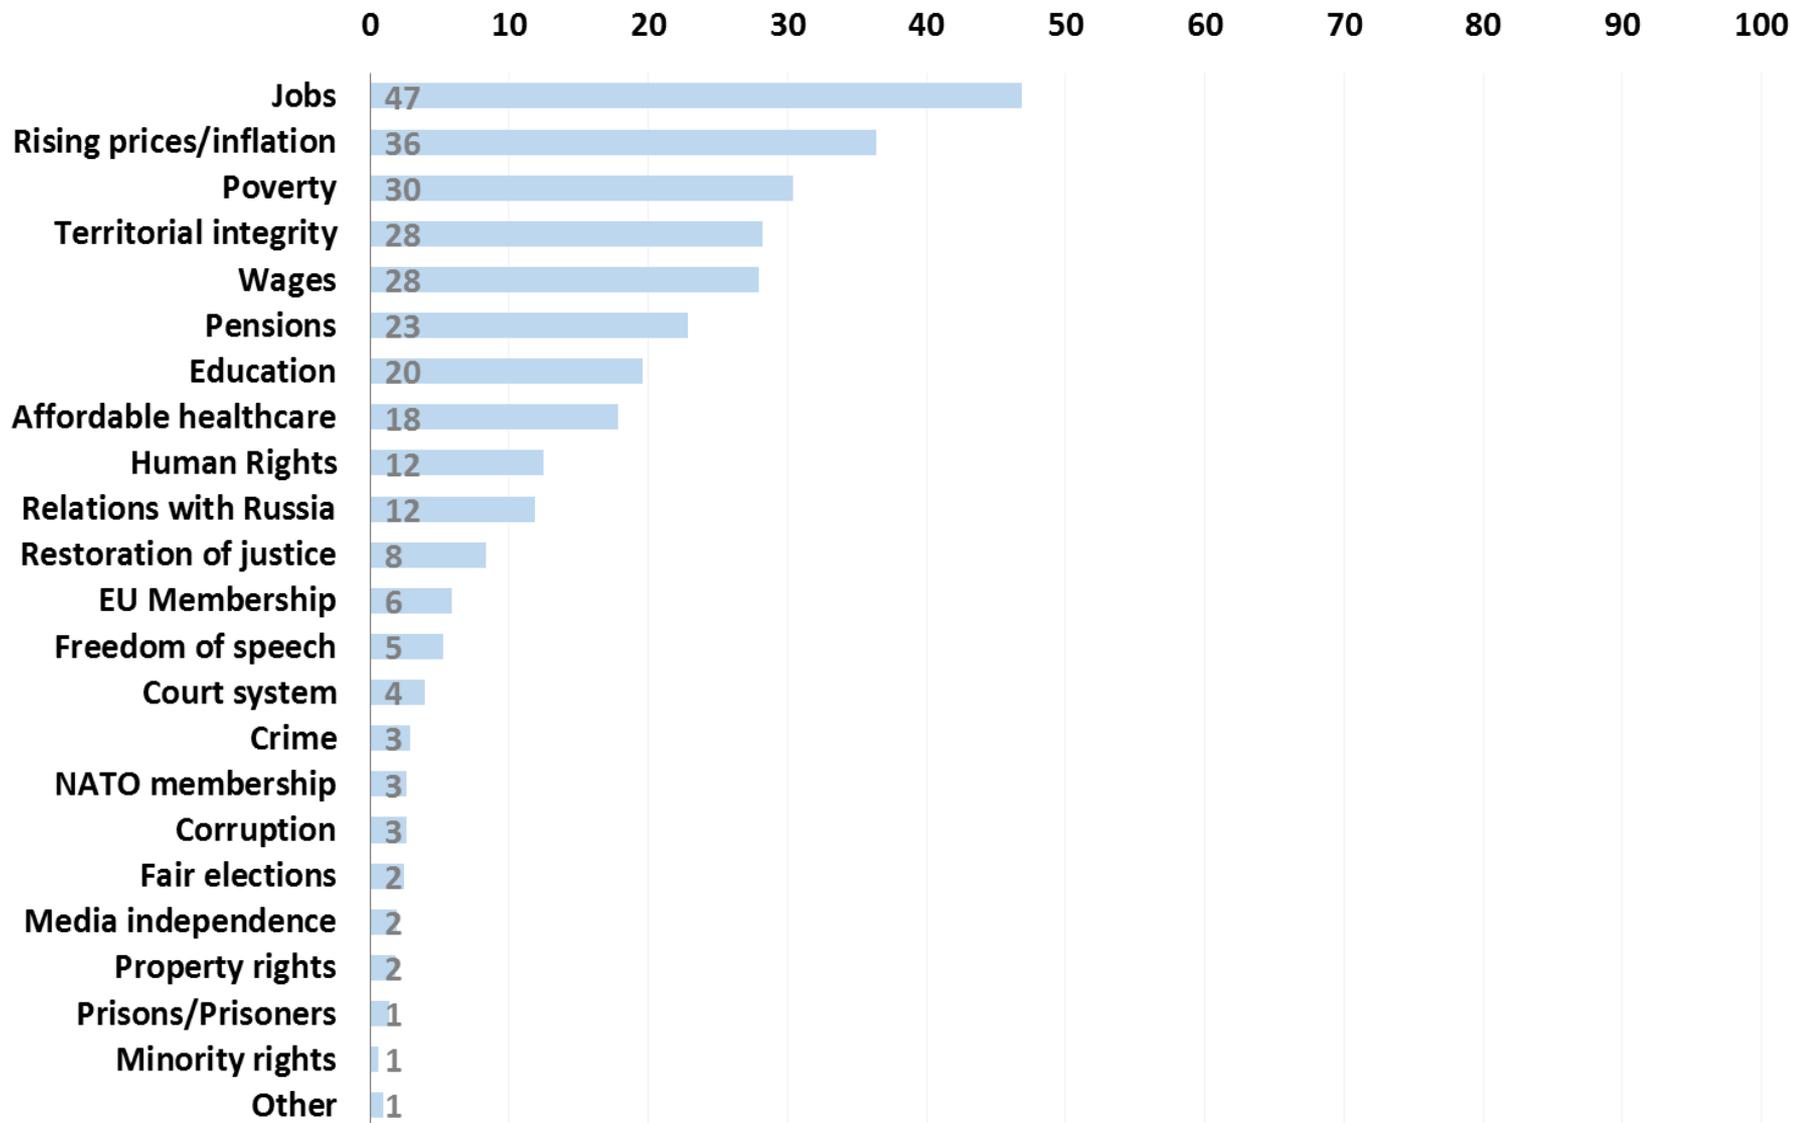

CRRC cleans and analyses collected data, which later is presented to the public.

COUNTRY'S DIRECTION
