

Factsheet

Caucasus Barometer is an annual survey about socio-economic issues and political attitudes conducted by the Caucasus Research Resource Centers (CRRRC) in the three countries of the South Caucasus: Armenia, Azerbaijan and Georgia. The project started in 2004. Representative nationwide data is available since 2008 (before 2010, the survey was titled The Data Initiative). The 2015 and 2017 waves of the survey were conducted in Armenia and Georgia only.

Population: Adults (18 years old and over), excluding the populations living in territories affected by military conflict (South Ossetia and Abkhazia).

Sample Design: Multi-stage cluster sampling with preliminary stratification.

Sample Size: 2379 respondents.

Response rate: 58%

Survey mode: Computer-assisted personal interview (CAPI)

Interview languages: Armenian, Azerbaijani, Georgian.

Fieldwork Dates: September 22, 2017 to October 10, 2017

Results are weighted.
