

Factsheet

Caucasus Barometer is a regular survey about socio-economic issues and political attitudes conducted by the Caucasus Research Resource Centers (CRRC) in the three countries of the South Caucasus: Armenia, Azerbaijan and Georgia. The project started in 2004. Representative nationwide data has been available since 2008 (before 2010, the survey was titled The Data Initiative). The 2015, 2017, 2019, 2021, and 2024 waves of the survey were conducted in Armenia and Georgia only.

Population: Adults (18 years old and over).

Sample Design: Multi-stage cluster sampling with preliminary stratification.

Sample Size: 1,561 respondents.

Response rate: 31%

Survey mode: Computer-assisted personal interview (CAPI).

Interview languages: Armenian.

Fieldwork Dates: July 27, 2024 to October 10, 2024

Results are weighted.

Principal Investigator for Armenia: Lilit Yezekyan, CRRC-Armenia Research Director.

Principal Investigator for Georgia: Dr. Tamar Khoshtaria, Senior Researcher and Caucasus Barometer Project Coordinator.

Caucasus Barometer Project Coordinator for Armenia: Hayk Smbatyan, CRRC-Armenia Deputy Research Director.
