

CRRC Omnibus Survey, Wave 1

Fact sheet

Population: Adult population of Georgia living in Tbilisi-administered territories, except areas of Abkhazia and South Ossetia.

Sample size: 1,001 completed interviews

Fieldwork dates: August 15th -September 2nd, 2019

Response rate: 40%

Interview mode: Computer-administered face-to-face interviews

Interview languages: Georgian, Armenian, Azeri

Survey design: multi-stage stratified cluster sample

Strata: Capital (Tbilisi), urban, rural settlements

Primary sampling units: electoral precincts

Household selection method: systematic sampling using random walk method

Respondent selection method: Kish grid

Weights: Results are weighted using the 2014 National Census data for adjusting results based on respondents' gender, age, and residence.

Average theoretical margin of error does not exceed 6.0%

Back checks: Ten percent of all interviews were checked via call-backs.

STATA code for survey settings:

For household-level analysis:

```
svyset psu [pweight=hhwt], strata(substratum) fpc(npsuss)
singleunit(certainty) || id, fpc(nhhpsu)
```

For individual-level analysis:

```
svyset psu [pweight=indwt], strata(substratum) fpc(npsuss)
singleunit(certainty) || id, fpc(nhhpsu) || _n, fpc(nadhh)
```
